Electric Installations in
Government buildings:
Taking over the -.

GOVERNMENT OF BOMBAY.
Public Works Department.
Circular No.. EIN. 1051.
Bombay Castle (Bombay No.1),
4th February 1952.

GOVERNMENT CIRCULAR.

Cases sometimes arise, where after the work of providing installation in a newly constructed Government building has been completed in all respects, the Head of the Administrative Department on whose behalf the work was undertaken, refuses to take over the electric installation, on the ground that the building has not actually been occuped by him. As a result, the electric installation consisting of electric fittings are found missing many times and are required to be replaced, involving unnecessary expenditure to Government.

2. In order to avoid the loss of fittings and the resultant financial loss to Government, it is essential that the occupants of Government residential buildings and the officers in charge of non-residential buildings, who are personally responsible for the electric installations therein as per paragraph 405 of the Bombay Public Works Department Manual, Volume I, or the Executive Engineer in charge of the buildings concerned should take over the electric installation, as soon as the report about the completion of the work of elec tric installation is forwarded to these officers by the Executive Engineer of the Electrical Department. The Heads of the Administrative Departments are accordingly requested to convey the above instructions to their subordinate officers and also to direct them that they should be followed very rigidly.

By order of the Governor of Bombay,

Id/-
M.S.CHAKRAWARTI,
Deputy Secretary to Government.

G.C., No. EIN 1051, dated the 4-2-1952.
